PROFESSIONAL SUMMARY

Frontend Software Engineer with hands-on experience building scalable React.js applications, Chrome extensions, and full-stack web platforms. Skilled in JavaScript (ES6+), React Hooks, Redux, REST API integration, and responsive UI development. Experienced in optimizing frontend performance, refactoring legacy applications, and building reusable component-based architectures. Passionate about creating intuitive user experiences and solving real-world product problems in collaborative engineering environments.

EXPERIENCE

Associate Software Engineer | Algoshack Technologies Pvt Ltd | Bengaluru | Nov 2024 – June 2026

- Rebuilt the algoScraper Chrome extension using React.js, migrating from a legacy HTML/CSS/JavaScript architecture to a modern component-based frontend.
- Developed reusable and responsive React functional components using JavaScript (ES6+) and React Hooks, ensuring cross-browser compatibility and improved maintainability.
- Implemented Redux-based state management for efficient workflow handling and persistence of recorded user actions.
- Integrated frontend components with RESTful APIs for dynamic data rendering and seamless communication with backend services.
- Collaborated with backend developers and product teams to design and deliver user-focused features aligned with business requirements.
- Optimized frontend performance and improved overall user experience through UI enhancements, debugging, and code refactoring.
- Troubleshooted and resolved frontend issues using Chrome DevTools and browser debugging techniques to improve application reliability and performance.

EDUCATION

B.E. in Mechanical Engineering | May 2023 | Bangalore Institute of Technology, Bengaluru

PROJECTS

Full Stack E-Commerce Application | Personal Project

- Developed a full-stack e-commerce platform using React.js, Spring Boot, and MySQL with separate user and merchant interfaces.
- Built reusable frontend components and implemented responsive UI designs for product browsing, cart management, and order workflows.
- Designed and integrated RESTful APIs for product, cart, authentication, and user management functionalities.
- Managed end-to-end data flow between frontend, backend, and database layers to ensure seamless application performance.
- Implemented state management and asynchronous API handling for dynamic and interactive user experiences.

AI Study Assistant | React.js, Vite, Material UI, Groq AI, Vercel | Personal Project

- Developed an AI-powered study platform that generates summaries, flashcards, quizzes, and tutor responses from user notes using LLM APIs.
- Built a fully responsive React application with Material UI and React Router, supporting seamless desktop and mobile experiences.

- Integrated Groq AI APIs for real-time content generation and implemented local storage for user preferences and chat persistence.
- Designed reusable component-based architecture and optimized UI responsiveness across multiple screen sizes.
- Deployed the application on Vercel and managed source control using GitHub.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Redux, React Hooks, Functional Components, State Management, Responsive UI Development
- **Backend:** Java, Python, RESTful APIs
- **Database:** MySQL, Oracle SQL
- **Tools & Platforms:** Git, GitHub, Postman, Chrome DevTools, Visual Studio Code, IntelliJ IDEA, Pycharm
- **Concepts:** Component-Based Architecture, State Management, API Integration, Debugging, Performance Optimization, Responsive Design, Code Refactoring

SOFT SKILLS

Problem Solving, Cross-Functional Collaboration, Communication, Adaptability, Attention to Detail, Time Management

CERTIFICATIONS

Java Full Stack Development – JSpiders, Bengaluru

- Completed full stack development training using React.js, Spring Boot, and MySQL.

LANGUAGES

English, Kannada, Hindi
